

Science is good when children are engaged

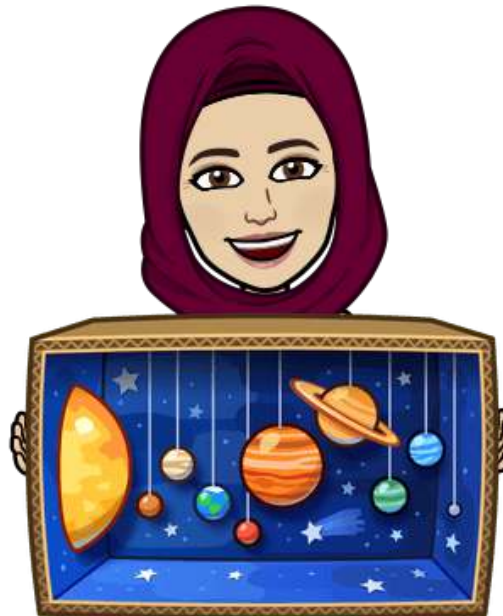

Science is good when it is practical

Science is fun when we are investigating

Science is good when it's fun

Science is good when it is linked with other subjects

Science is good when there are lots of experiments

Science Core Principles

Our children think science is good when....

- There are lots of experiments
- When science is fun

Our teachers think science is good when...

- Children are engaged
- It is practical
- When we are investigating
- When it is linked with other subjects

Science Vision

At MMPS Science is important to us. We like to develop and feed children's curiosity. We want to make sure children leave MMPS with the life skills needed to succeed. We ensure children learn through questioning and practical experiences. We believe science is all around us and that children are aware of the science in the 'real world'.
