

TOPIC LIST- RECEPTION

TERM- SUMMER 1

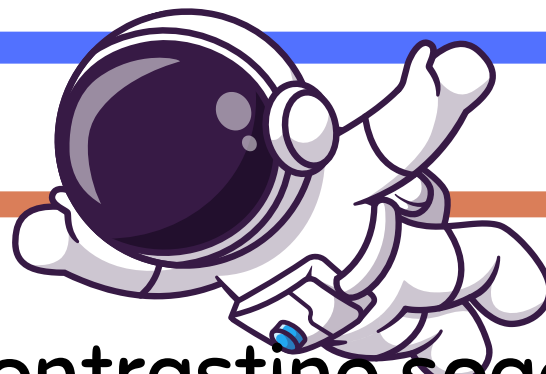

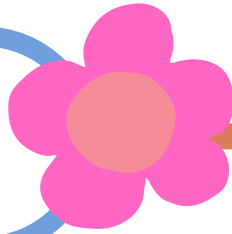

Class Teacher- Miss Grant

Teaching Assistant- Mrs Chaudhry & Mrs Ahsan

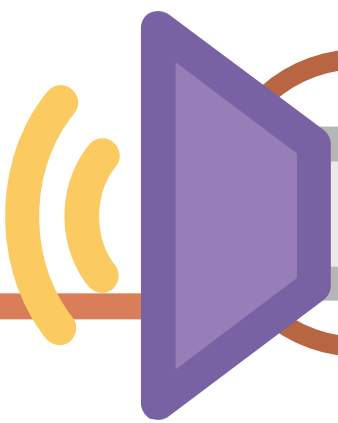

Theme: "To boldly go where no Reception child has gone before"

LITERACY

Reception will be comparing and contrasting space themed story books by the author and illustrator Oliver Jeffers and also Jill Murphy. The class will be encouraged to anticipate events and then once familiar with the texts to retell the stories using words from the text. We will also examine fact books about Space including a biography about British astronaut Helen Sharman. The children will be given opportunities to write space themed captions and speech bubbles for astronauts and aliens they discover in the books we read. Together they will recall new information they've learned and help an adult to write some space facts.

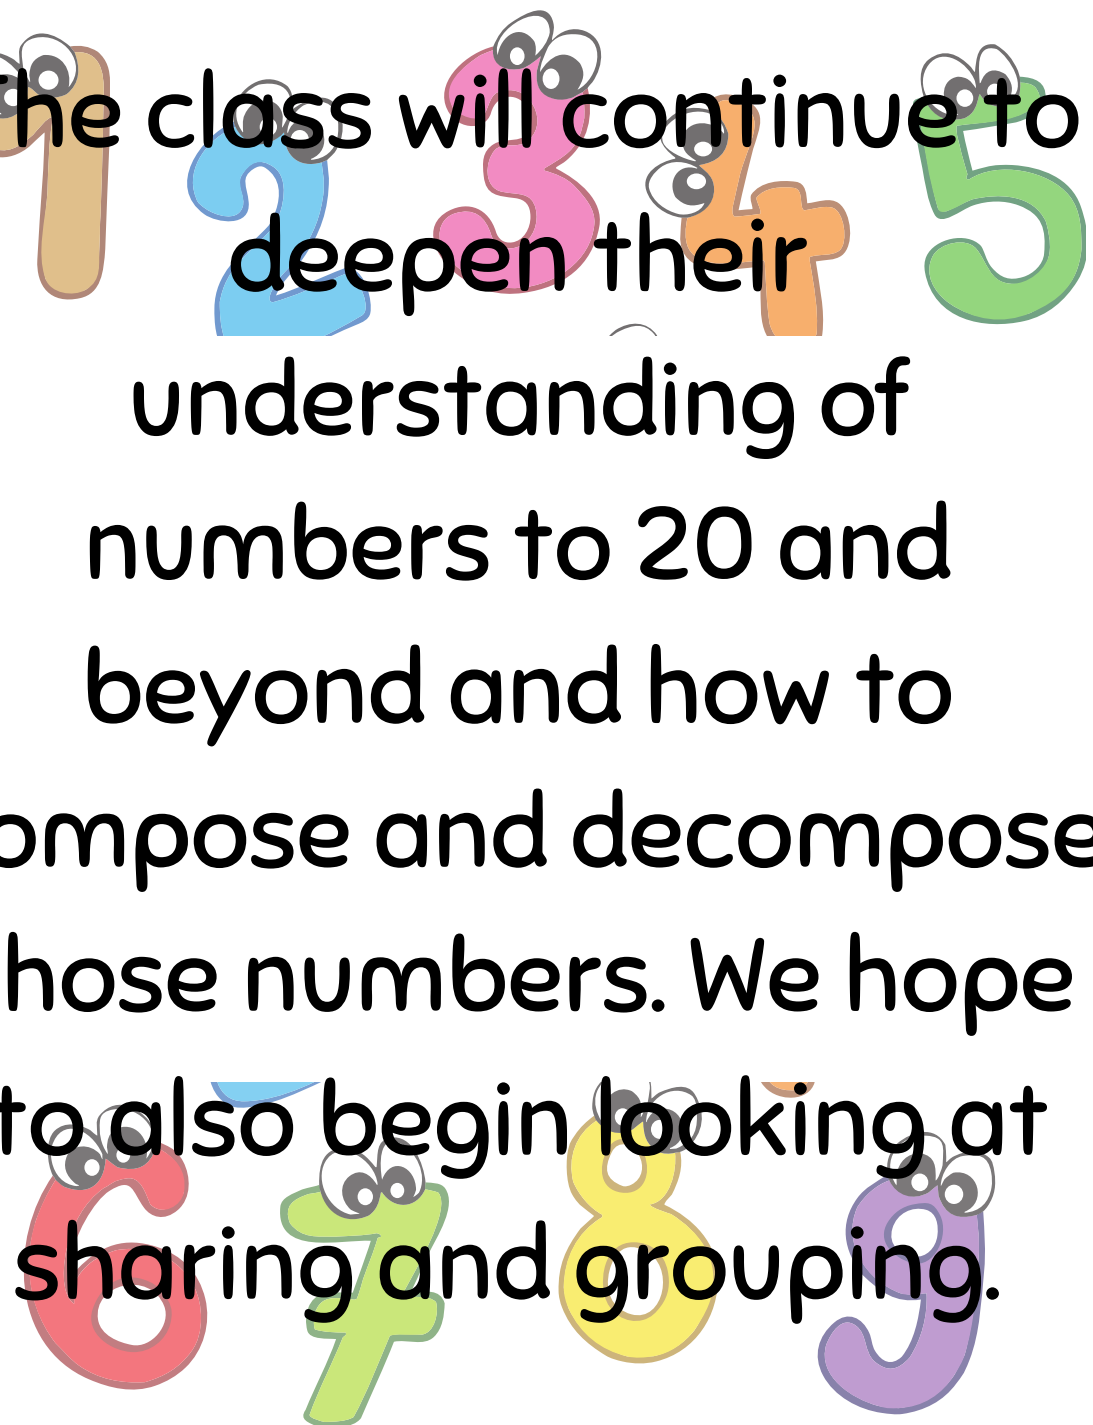

MATHS

PHONICS

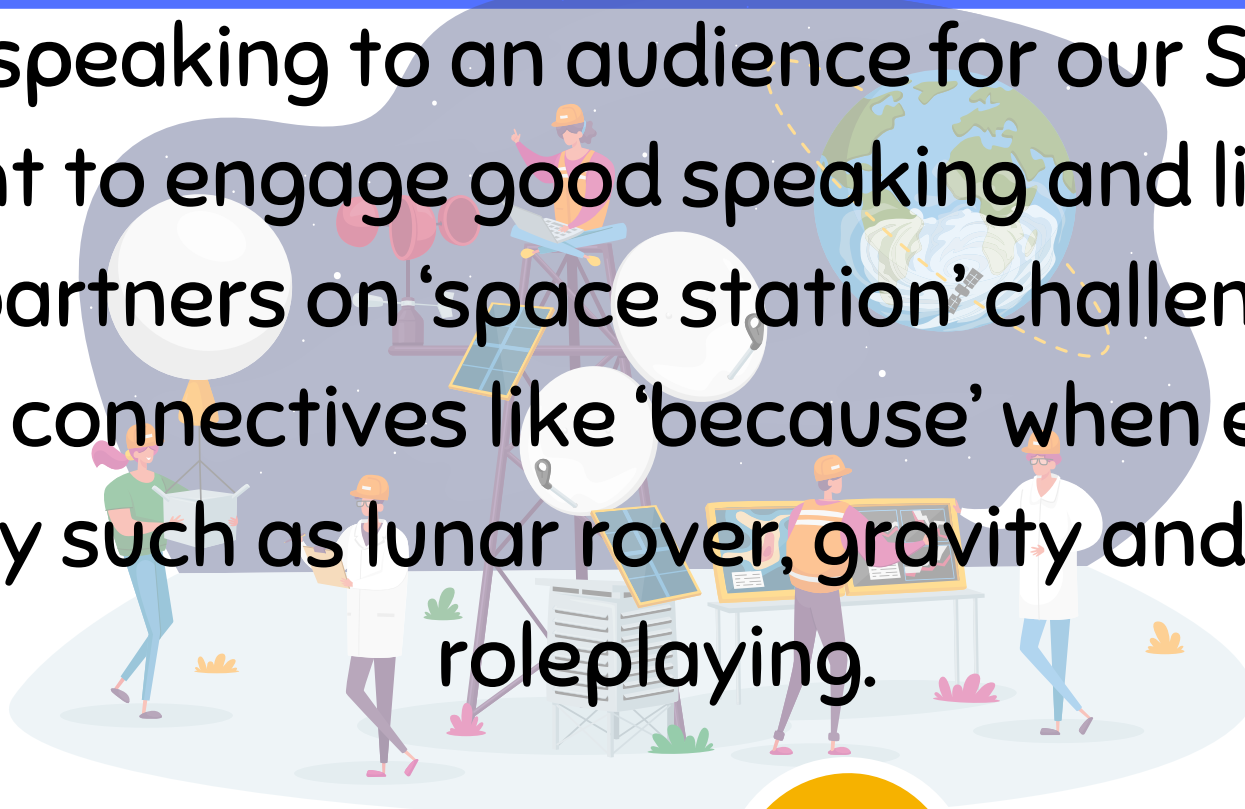

This term Reception will finish learning the Phase 3 sounds air, ear, ure, [treasure+ pure] er and begin learning phase 4 sounds. We will learn to read tricky words: such as her, there, here, . . Reception will continue to memorise any phase 2 memory words they find difficult and continue practising reading phase 3 high frequency words so that they can recognise the words instantly and don't need to blend them.

The class will continue to deepen their understanding of numbers to 20 and beyond and how to compose and decompose those numbers. We hope to also begin looking at sharing and grouping.

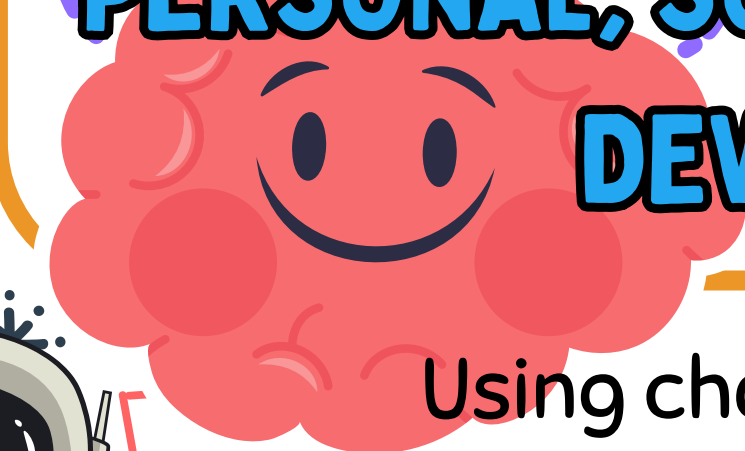

COMMUNICATION AND LANGUAGE

Pupils will practise speaking to an audience for our Space assembly. They will also be taught to engage good speaking and listening skills when working with partners on 'space station' challenges. They will be encouraged to use connectives like 'because' when explaining and to use new vocabulary such as lunar rover, gravity and meteorite when roleplaying.

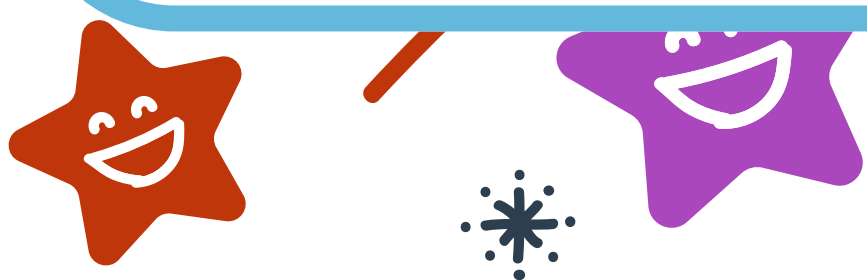

PERSONAL, SOCIAL AND EMOTIONAL DEVELOPMENT

Using characters from book we will investigate confidence and resilience. We will also be looking at how to resolve conflicts and persevere and communicate our feelings when facing challenges.

EXPRESSIVE ART & DESIGN

We hope to make space inspired art using a variety of medias and materials

UNDERSTANDING THE WORLD

Reception will be exploring our school and looking at maps and globes including satellite images and aerial photographs/videos. They will be introduced to the solar system and learn about our planet. Pupils will also discover who Helen Sharman and Tim Peake are, and conduct some of their own experiments.

Pupils will learn to travel in a variety of ways including using equipment and develop greater confidence kicking, passing and throwing balls and getting ready for sports day.

PE

ISLAMIC STUDIES

5 Pillars of Islam

Plants and environment

Allah gives us money

We pray Salah

Everything belongs to Allah

Importance of remembering Allah wherever we are.
